SUMMARY

Mobile Engineer (Android & Cross-Platform) with 5+ years of experience building scalable, user-focused applications across fintech, logistics, and enterprise solutions. Proven track record delivering high-impact mobile products, including banking applications and multi-tenant systems.

Skilled in Kotlin, React Native, and Flutter, with deep knowledge of clean architecture, API integration, and performance optimization. Passionate about building reliable products, scaling teams, and delivering measurable impact.

Also an experienced Program Manager with 5+ years leading large-scale tech training initiatives (KodeCamp), successfully training 700+ developers and growing a 4000+ member tech community.

Product Designer with strong expertise in product thinking and user experience design, translating business requirements into intuitive, high-performing digital solutions.

PERSONAL SKILLS

- Professional
- Teamwork
- Flexibility
- Creativity
- Management

SKILLS/TOOLS

- Critical Thinking • MVVM Architecture
- Java • Kotlin • Swift • Python • Testing
- JavaScript • HTML/CSS • GIT • Trello • Jira
- Android • REST • Firebase • Dependency Injection
- MongoDb • Retrofit • Problem Solving
- Figma • AdobeXD • Linear
- Flutter • Dart • CI-CD Pipelines

EDUCATION

BSc Computer Science

Rivers State University/2018

WORK EXPERIENCE

KodeHauz Solutions Planet Limited

Lead Mobile Developer, Senior Tech Lead / 2019 - Present

- Led the Mobile Development team to build mobile solutions for the Company and clients.
- Developed and implemented software solutions based on client requirements.
- Tested and refined software before rollout

KodeHauz Solutions Planet Limited

Program Manager / 2021 - Present

- Led the team successfully executing 4 boot camps for the Company's online training platform (KodeCamp).
- Managed the online training platform that graduated 700+ trainees in 4 boot camps.
- Managed the online community to foster learning and collaboration between learners.

KodeHauz Solutions Planet Limited

Training Lead / 2021 - 2022

- Led the training arm of the company to implement effective training methods and scale the training thereby increasing revenue and the number of students.

KodeHauz Solutions Planet Limited

Trainer / 2020 - 2023

- Trained students in Mobile App Development.
- Trained students in UX Design
- Trained students in Programming Foundations using Python.
- Mentored trainees on their final projects.

KASI CLOUDS Ltd

DevOps Engineer Level 1 / 2023

- Led the DevOps team on training and development
- Implemented various development, testing, automation tools, and IT infrastructure
- Planned the team structure, activities, and involvement in project management activities

Innovanitics

Mobile Developer (Android & React Native) / 2025

- Led development of scalable mobile applications for enterprise clients using Android and React Native technologies.
- Contributed to the development of the UINSta (UBA Mobile App), implementing key features that enabled seamless customer account creation, onboarding, and setup.
- Collaborated with cross-functional teams to translate client requirements into functional, high-quality mobile solutions.
- Identified and resolved deployment bugs, ensuring stable releases and optimal application performance.
- Played a key role in building a multi-tenant banking solution, designing and implementing tenant architecture for multiple financial institutions.
- Developed proof-of-concept (POC) mobile applications tailored for different banks to demonstrate platform capabilities and accelerate client adoption.
- Ensured all deliverables met client expectations, industry standards, and usability best practices.

CLIENT PROJECTS

Radio Basar

An online radio application.

- Worked with the designer to implement the UI of the application.
- Implemented the radio streaming feature on the application.
- Set up the radio streaming service for the client.
- Implemented bug fixes and other features on the application as deemed fit by the company.

Craftzone

CraftZone is an app that allows you to get access to services and service providers around you quickly and easily.

- Implemented new features such as the ticketing system with chat functionality.
- Pushed updates to the play store
- Led the team in developing the product.
- Revamped the former user interface for a better user experience.
- Used best practices for development such as clean coding standards, modularity, object-oriented programming concepts like inheritance & polymorphism, etc., and TDD (Test Driven Development) principles when applicable.

MSF

An Inventory Management Platform

- Designed intuitive and visually appealing user interfaces using the Flutter framework.
- Worked closely with designers to translate wireframes and mockups into interactive UI components.
- Implemented responsive design principles to ensure optimal user experience across different devices and screen sizes.
- Developed frontend components and features using Dart programming language and Flutter SDK.
- Implemented state management techniques for efficient data handling and UI updates.
- Integrated custom widgets, animations, and gestures to enhance user interaction and engagement

Catholic Hymns & Liturgy

Catholic Hymns & Liturgy is an app designed for Nigerian Christians to enhance personal spiritual growth and active participation in communal worship.

- Tasked with implementing a redesign of the application
- Built the new version of the app using Kotlin in place of the previously written code in Java

VanBoss

A flutter logistic application.

- Implemented app designs and logic
- Collaborated with product designer and manager for a seamless flow of the the project.
- Worked on implementing map integrations between customer and driver.

PERSONAL PROJECTS

Mentors Tower

A platform where users can find mentors in a specific area and get mentorship from seasoned mentors.

- Led the team in building and deploying product.
- Built and deployed the Mentors Tower application on the Google play store
- Offered App support by monitoring analytics on the play store console.
- Carried out bug fixes and new features based on user and client feedback.

Link: https://play.google.com/store/apps/details?id=app.app.mentorstower

iSolve Notes

A notebook application for creating and saving notes/to-dos.

Link: https://github.com/Ikey22/ISolveNotes

Go

A taxi ordering application.

- Led a team of designers, developers, and product manager to build the product.
- Worked on implementing integration with Firebase and all back-end dependencies.
- Implemented major logic and app functionality of the application

IoTApp

An IoT app that turns on and off a switch. Built using Java and MQTT.

- Designed and implemented logic for sending messaging protocols.
- Worked on implementing integration with MQTT on the Android platform.

Link: https://github.com/Ikey22/IoTApp

Blood Donation App

An app where users can find blood donors of a specific blood type and request blood donation

- Designed the app using the Figma tool.
- Built the application using Kotlin, Firebase, and Android Studio.
